

**ETV Wet Weather Flow Technologies Pilot
ETV Technology Panel on High Rate Disinfection
Meeting Announcement
August 31-September 1, 1999**

Date: August 31-September 1, 1999

Location: Offices of Hydroqual, Inc.
1 Lethridge Plaza (off Route 17)
Mahwah, NJ 07340

We have also tentatively scheduled a tour of the Rockland Co. Wastewater Treatment Facility in Orangeburg, NY from 3:30 - 5:00 PM on September 1, 1999. This facility may prove suitable for verification testing of UV disinfection technologies.

This Technology Panel has been established under the Wet Weather Flow Technologies Pilot of the US EPA Environmental Technology Verification Program (ETV). The function of the Technology Panel is to guide the development of Test Protocols for the verification of technologies used for, or in conjunction with, the high-rate disinfection of combined sewer overflows and sanitary sewer overflows.

The primary objective of the scheduled meeting is the review and discussion of two Draft Test Protocols, one for High Rate Mixing Technologies and one for High Rate UV Disinfection Technologies. These Draft Protocols are currently under development by Moffa and Associates and Hydroqual, Inc., respectively. Drafts will be made available to the Panel members and other planned attendees prior to the meeting.

The Technology Panel Meeting is open to all interested stakeholders. Vendors of the aforementioned technologies are strongly encouraged to participate in the protocol development process.

The Preliminary Agenda for the meeting is as follows:

August 31, 1999 -

- | | |
|-------------------|---|
| 12:30 PM -1:30 PM | Overview of ETV Objectives and Procedures
Review of Technology Panel Role and Activities |
| 1:30 PM - 4:30 PM | Review and Discussion of Verification Protocol for High Rate Mixers |
| 4:30 PM - 5:00PM | Testing Schedule and Identification of Potential Test Sites for Mixer Verifications |

September 1 -

- | | |
|-------------------|---|
| 9:00 AM - 2:30 PM | Review and Discussion of Verification Protocol for UV Disinfection Technologies |
|-------------------|---|

2:30 PM - 3:30 PM	Testing Schedule and Identification of Potential Test Sites for UV Verifications
3:00 PM	Adjourn
3:30 PM - 5:00 PM	Tour of Rockland Co. Wastewater Treatment Facility (Potential UV Test Site)
